

Blood Tests- Reproductive Health

Pregnancy blood test (VHL-BHCG)

£60.00 - 1 day for results

Harmony NIPT Testing (NIPT)

This blood test is a non-invasive prenatal screening test (NIPT) that can be conducted minimum 10 weeks from conception. It is a simple blood test taken from the mother which is then analysed for foetal cell-free DNA.

It can be used to detect the most common chromosomal defects, including Down syndrome, Edwards syndrome and Patau syndrome. It can also identify the sex of your baby.

£370.00 - 3-5 days for results

Female Hormone Profile (VHL16)

A look at the female hormone levels to see if they are within normal parameters.
